- Made in the U.S.A.
- Manufactured in N.H.
- Bingham's office, showroom, kilns and manufacturing plant are heated by using wood waste

With its lively swirling grains and varying sap/heart content, Classic Ash flooring is a timeless choice. Due to its density and beauty, it has been used for many years in the creation of baseball bats as well as millwork and furniture. The wide grain and porosity of this wood allows it to take a dark or light stain beautifully. There is quite a distinction between the white sap wood and the rich brown heartwood. Ash has a hardness that rivals White Oak, making this a very dense and durable flooring choice.

Ash is found throughout the eastern part of the United States. Often found in areas of moist soils, ash trees are typically mixed in throughout other hardwood trees. Some of the finest ash trees are found on slopes in low lying valleys.

*Please note that wood is a natural product and because of this we recommend ordering samples of our products before making your flooring choice. We will send multiple pieces of each product to give a full representation of the grade and specie. Together, these pieces represent the grade, specie or product specified. Please do not reference an individual sample, piece of the sample or image as an accurate representation of the entire grade, specie or product. Please consult your sales representative with any questions or to request more samples.
