- Made in the U.S.A.
- Manufactured in N.H.
- Bingham's office, showroom, kilns and manufacturing plant are heated by using wood waste

Wide Plank Eastern White Pine Flooring has been a staple in the Bingham family for over 69 years. Harvested from Northeastern White Pine timber, our white pine flooring is produced in a few choice grades. Our Select Grade white pine will feature small pin-hole knots, varying grain patterns and a crisp white appearance. Our more traditional Sawyers Grade will contain varying degrees of sound, tight and red knot structure, varying grain patterns and a creamy white appearance. Eastern White Pine is our widest plank flooring option available and can be textured, distressed or stained to give an antique or "worn" appearance.

Bingham's Wide Plank Eastern White Pine is harvested from mature Northeastern U.S. white pine timber, milled and produced in New England. Many antique New England homes feature wide plank white pine floors that show years of wear and a natural aged glow. Traditionally these floors were painted, coated with a heavy polyurethane or left unfinished and allowed to age naturally.

*Please note that wood is a natural product and because of this we recommend ordering samples of our products before making your flooring choice. We will send multiple pieces of each product to give a full representation of the grade and specie. Together, these pieces represent the grade, specie or product specified. Please do not reference an individual sample, piece of the sample or image as an accurate representation of the entire grade, specie or product. Please consult your sales representative with any questions or to request more samples.
