

CLASSIC PLANK

HICKORY

Wide Plank Flooring

Our Classic Wide Plank Hickory is an attractive flooring choice. Featuring the highest density of any North American hardwood, hickory will stand up to high traffic and use. A vibrant range of light brown heartwood and creamy white sapwood, along with a tight grain make this a floor that is versatile enough to be use in a log home or a modern loft. Our Select Grade hickory will have pin-hole knots, tight grain with varying grain patterns and color variation. Our Sawyer's Cut has sound character, mixed grain patterns and a varying color. We also offer a Sawyer's Cut Saw Kerf that contains the same characteristics as our sawyer's cut grade but will have a rustic circle sawn face, reminiscent of the antique circle saw mills.

Hickory is a domestic hardwood found in the eastern part of the United States. Hickory is rarely found in pure stands, commonly found scattered throughout hardwood woodlands in low lying areas where moist soil is found. Although found in the Northeast, most of the quality timber the Bingham team sources is from the mid Atlantic states

*Please note that wood is a natural product and because of this we recommend ordering samples of our products before making your flooring choice. We will send multiple pieces of each product to give a full representation of the grade and specie. Together, these pieces represent the grade, specie or product specified. Please do not reference an individual sample, piece of the sample or image as an accurate representation of the entire grade, specie or product. Please consult your sales representative with any questions or to request more samples.
