

CLASSIC PLANK

RED OAK

Wide Plank Flooring

As one of the most popular hardwood flooring choices, suitable for any style home, Red Oak is used as a standard for rating other hardwoods. Traditionally produced as a select strip flooring product, Bingham has chosen to produce this product is a variation of wide widths and grades. We offer a select grade, free of knots, containing varying grain structure and a natural blush hue with flecks of brown. Our Sawyers Grade features all of the select characteristics, but allows for a more rustic appearance of knots and other minor defects. We also produce a select rift and quarter-sawn for a more stable flooring choice and most popularly used over radiant heat. Due to the broad graining and porosity, this specie can be easily textured and stained to achieve a custom handcrafted floor.

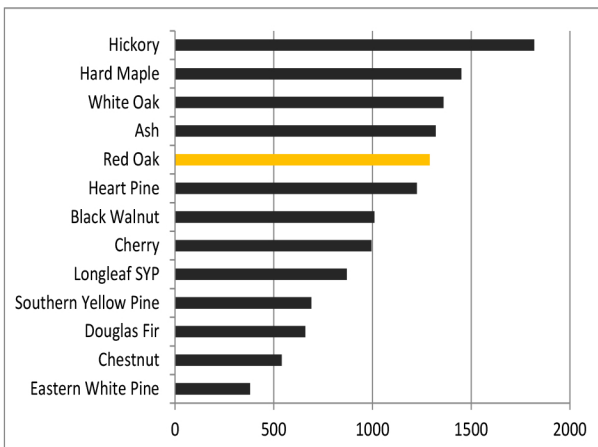

Red Oak trees are found in the U.S. in the Northeastern and North-central areas of the country. However they have been known to reach as far south as Georgia and as north as Canada. Oak Wilt has become an epidemic in many parts of the country, attacking the water conducting vessels and essentially killing the tree and surrounding red oak species. Although, Red Oak is still one of the most common flooring species manufactured today.

*Please note that wood is a natural product and because of this we recommend ordering samples of our products before making your flooring choice. We will send multiple pieces of each product to give a full representation of the grade and specie. Together, these pieces represent the grade, specie or product specified. Please do not reference an individual sample, piece of the sample or image as an accurate representation of the entire grade, specie or product. Please consult your sales representative with any questions or to request more samples.
