- Made in the U.S.A.
- Manufactured in N.H.
- Bingham's office, showroom, kilns and manufacturing plant are heated by using wood waste

Our reclaimed wide plank Maple flooring has a natural creamy white appearance with varying tones of brown heartwood. Grain patterns vary from flat-sawn, to swirling and even some bird's eye maple is included in this classic flooring choice. Adding an oil-based finish will enhance the natural tones in this wood, presenting a golden brown hue.

The most common source of reclaimed maple is from original floors such as bowling alleys, gym floors, mills and antique homes. Occasionally we source antique maple from sleeper beams and timbers that produce unique variations of tap and spalted maple.

*Please note that wood is a natural product and because of this we recommend ordering samples of our products before making your flooring choice. We will send multiple pieces of each product to give a full representation of the grade and specie. Together, these pieces represent the grade, specie or product specified. Please do not reference an individual sample, piece of the sample or image as an accurate representation of the entire grade, specie or product. Please consult your sales representative with any questions or to request more samples.
